

RoGO Connects Cellular-Denied Areas
Satellite-Enabled Communications Hardware, Custom Comms
Software, Remote IoT & Predictive Data Analytics Capabilities

Capability Statement

RoGO Fire LLC, DBA RoGO Communications provides lightweight, portable satellite-enabled hardware devices, special SATCOM data transmission software methods and geo-location-specific Predictive Analysis software that helps All-Hazards Emergency Responders gain Situational Awareness and scene-critical information in a timely manner while fighting disasters that occur in, or cause there to be a cellular-Denied area.

RoGO's mission is to help all First Responders better mitigate disasters like *Wildfires, Hurricanes, Earthquakes and Floods* faster and safer, and save more lives by enabling a communicated, coordinated tactical effort among many First Response personnel.

Services and Products

For Handcrews & equipment: RoGO's DropBlocks provide GPS tracking of crews and equipment, sends local wind speed/direction & RH field reporting back to the IMET (and/or FBAN), and acts as the data and communications portal between ICP and remote Handcrews.

For Strike Force & Task Force Leaders, RoGO provides a 700kbps full-IP solution so any IM platform *plus* any weather/fire predictive behavior analysis solution can run in the middle of the woods or in any remote, austere cellular-denied area. Enables full comms & SA with ICP.

Past & Present Performance

- Arapahoe County Colo OEM - Monitoring Fire Weather conditions continuously 24/7
- Now GPS tracking Wildland Firefighters & Equip on wildfires in CO, UT, CA, MT & WA
- Transmitting wind speed/wind direction to Local Firefighters, the IMET and FBAN
- 2 Utility Patents cover our 3-part system

Differentiators

- Special SATCOM signal Data Formatting = more data per Tx = greater bandwidth
- Satellite Data "Parsing Software" sends long data strings over SBD connection
- Predictive Data Analytics
- Personal SATCOM devices up to 700kbps
- Worldwide Comms & Data Anywhere
- Small, Lightweight, Portable Devices
