

RoGO Connects Cellular-Denied Areas
 Satellite-Enabled Communications Hardware, Custom Comms Software, Remote IoT & Predictive Data Analytics Capabilities

Capability Statement

RoGO Fire LLC, DBA RoGO Communications provides lightweight, portable satellite-enabled hardware devices, special SATCOM data transmission software methods that helps Military personnel gain Situational Awareness and scene-critical information, and breach information silos in a timely manner when operating in austere, remote, radio-denied areas.

RoGO's mission is to help Military personnel better mitigate conflicts and disasters faster and safer while saving more American and Allied lives through enabling a communicated, coordinated tactical effort among many ground, airborne and seaborne personnel.

Services and Products

For Troops on foot and equipment: RoGO's DropBlocks provide GPS tracking of crews and equipment on ATAK, enables point-to-point communications at the edge, gives paratroopers ground wind info & sends field sensor data to all regionally-deployed personal and to Command & Control. DropBlocks are a backup data and comms portal when MANET connections fail.

For light vehicles, RoGO provides a 700kbps full-IP solution so ATAK *plus* any predictive analysis solution can run in the middle of any remote, austere, cellular-denied area. Enables full comms & SA with Command & Control. Enables coordination between ground & airborne personnel.

Past & Present Performance

- Arapahoe County Colo OEM - Monitoring Fire Weather conditions continuously 24/7
- Now GPS tracking Wildland Firefighters & Equip on wildfires in CO, UT, CA, MT & WA
- Transmitting wind speed/wind direction to Local Firefighters, the IMET and FBAN
- 2 Utility Patents cover our 3-part system

Differentiators

- Special SATCOM signal Data Formatting = more data per Tx = greater bandwidth
- Satellite Data "Parsing Software" sends long data strings over SBD connection
- Predictive Data Analytics (in development)
- Personal SATCOM devices up to 700kbps
- Worldwide Comms & Data Anywhere
- Small, Lightweight, Portable Devices
