RoGO Connects Cellular-Denied Areas

Satellite-Enabled Communications Hardware, Custom Comms
P2P Software, Remote IoT & Data Reporting from Austere Areas
SBA SDB & DBE, Colorado OEDIT Enterprise Zone Certified

Capability Statement

RoGO Fire LLC, DBA RoGO Communications makes small, portable, instantly-deployable satellite-enabled devices using special SATCOM transmission software that provides a COP by tracking GPS locations of people and assets, enabling P2P communications and providing critical data at the edge. helping All-Hazards Emergency Responders obtain scene Situational Awareness information and tactical collaboration in a timely manner when fighting disasters that occur in or cause there to be a cellular-Denied area.

RoGO's mission is to help all First Responders better mitigate disasters like *Wildfires, Hurricanes, Earthquakes and Floods*, faster & safer and to save more lives by enabling a communicated, coordinated tactical effort among First Response personnel.

Services and Products

For *Handcrews & equipment*: RoGO's Instantly deployable DropBlocks GPS track crews and equipment, sends remote wind speed/direction & fire weather data to the IMET and/or FBAN, and acts as the data and P2P communications portal between remote Handcrews, TFLs and ICP.

For *Task Force Leaders & ICP*, RoGO provides a 700kbps full-IP solution so any IM platform *plus* any weather/fire predictive behavior analysis solution can run in the middle of the woods or in any remote, austere cellular-denied area. Enables full comms & SA with ICP.

Past & Present Performance

- USFS FMO WA State remote fire weather Monitoring & GPS tracking
- AZ Dept. of Forestry and Fire Management
- Current pilots for GPS tracking & Fire Weather Monitoring of Wildland Firefighters in CO, UT, CA, MT & WA
- 2 Utility Patents cover our 3-part system

Differentiators

- Special SATCOM signal Data Formatting = more data per Tx = greater bandwidth
- Satellite Data "Parsing Software" sends long data strings over SBD connection
- 2 Utility Patents cover our 3-part system
- Personal SATCOM devices up to 700kpbs
- Worldwide Comms & Data Anywhere
- Small, Lightweight, Portable Devices

NAICS:

115310–Support Activities for Forestry   **334220**-Wireless Communications Equipment Manufacturing
334290–Other Communications Equipment Manufacturing
423690–Other Electronics Equipment Merchants
